

## Firmware Upgrade

1-1. Copy the upgrade files “**uClinix.img.gz**” & “**fs.jffs2**” under **C:\** or **D:\**

**Notice:** 1. Don't Put the upgrade file under Desktop or other MS document. ex: my document.

2. The file name must be uClinix.img.gz & fs.jffs2

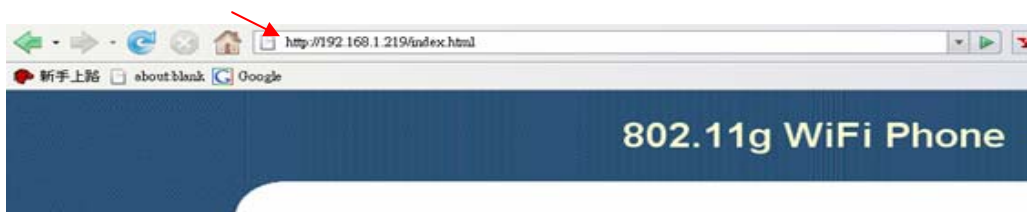

\* Before upgrade Please check your WiFi Phone >>[ Phone Settings] >> [Web Configuration] –Choose “Enable”.

\* Please be sure the battery power is uninterrupted when the phone is upgrade.

1-2. Press  on your WiFi phone, the IP address will show right away on the screen.

ex : 192.168.1.219

1-3. Input the IP address on the browser

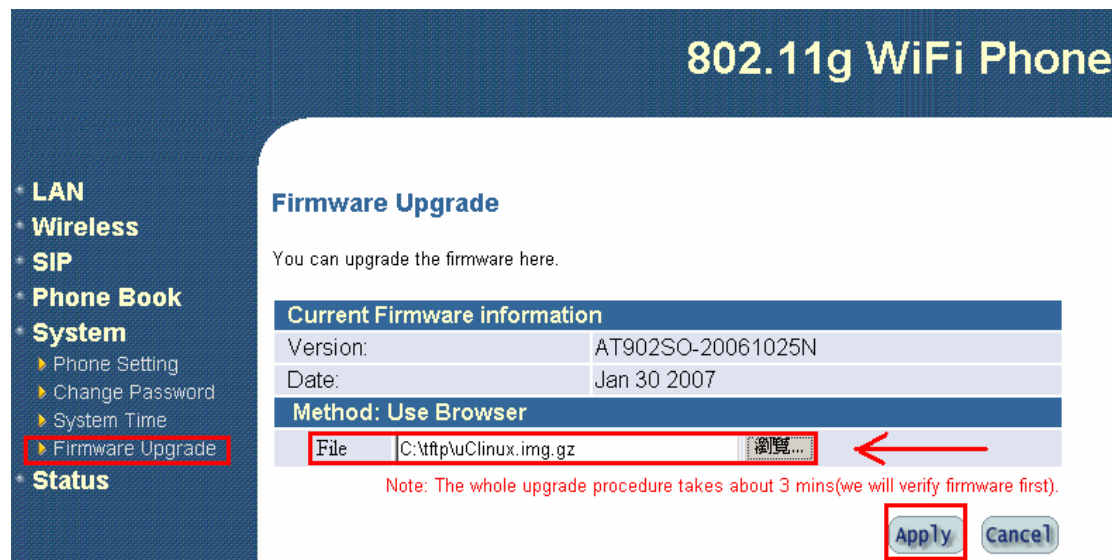

1-4. Input username & password

**User name:** admin

**Password:** 1234

## Enter into Web Configuration Page

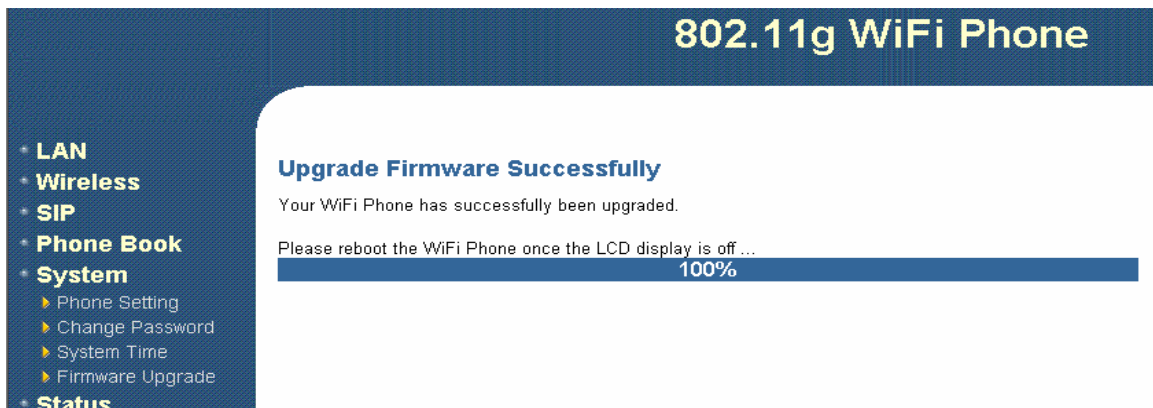

2-1. Go to [System] >> [Firmware Upgrade]

2-2. Use “browser” to link the upgrade file (The two file from 1-1)

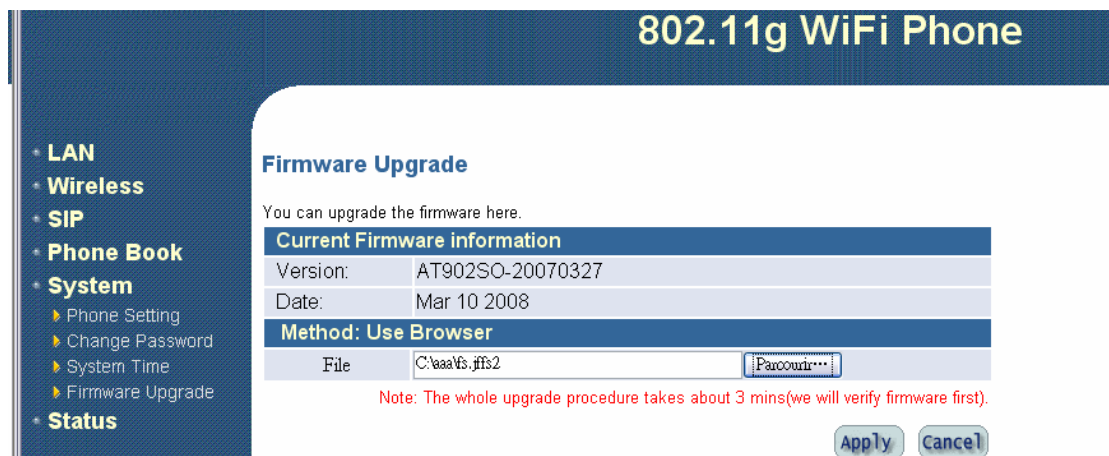

2-3. Press [Apply] button and [Yes] [Yes] button to continue upgrading.

2-4. Wait until the progress bar is about 50%, check if the WiFi Phone display is off.

2-5. After the upgrade process is successfully finished, you will receive the message as follows:

2-6. Repeat the above-steps, do the same process with file [fs.jffs2](#)

2-7. WiFi Phone will turn off it's self, please re-start & check the version.([Tool]>>[Firmware Version]>> **(roll down)** [Firmware Date]
