

Welltech Product Release Note

Date: Feb-24-2009, 2009 年 2 月 24 日

Division:	SDD1	Releaser:	Songyo
Model Name:	LP-399	Object:	<input type="checkbox"/> H.W. <input checked="" type="checkbox"/> S.W.
Subject:	release firmware LP-399_108.rom, LP-399 軟件昇級版		

Release contents 發佈內容

Bug Fixed 修正項目

1. Support DTMF RFC 2833 does not send correctly after call is connected. Some digits might not be recognized by remote side correctly.

修正在通話建立後, DTMF/RFC2833 沒有正確發送問題. 某些數字在遠端沒有正確的被辨認.

Feature and Function Added 新增功能

1. Support Full Duplex Acoustic Echo Cancellation Hand-Free Speaker Phone instead of Half Duplex. (This released version default is Full Duplex Hand-Free Speaker Phone)

支持全雙工免提聽筒通話. (出廠設定值已設定為全雙工免提聽筒通話模式)

2. Support TFTP server auto configuration to LP-399 by using DHCP client tag 66 option. When LP-399 requests an dynamic IP from DHCP server, the DHCP server will return an “ tag 66 “ command with TFTP Server IP address. Note: Both TFTP Server and LP-399 have to install at the same DHCP Server environment.

當 LP-399 向 DHCP 伺服器索取一組動態 IP 時, DHCP 伺服器會回應一組 IP 給 LP-399 同時附帶” tag 66 ” 選項內含 TFTP 伺服器現在 IP 地址. LP-399 立即自動透過網路和 TFTP 伺服器聯繫, 並自 TFTP 伺服器自動進行更新設定. 注意: 使用此功能時, TFTP 伺服器和 LP-399 必須安裝在同一個 DHCP 伺服器環境上.

Configuration Item Changed

中文偉僑網頁, <http://www.welltech.com.tw>

Firmware Download, http://www.welltech.com/support/lanphone_399.htm

下載軟件更新, http://www.welltech.com/support/lanphone_399.htm

User Manual, http://www.welltech.com/support/lanphone_399.htm

Note 注意

1. Login user root's password changed to "test"

登入的用戶密碼(User Root)更改為 " test "。

2. If your firmware Version 108 later, please add the "speakerset.htm" behind the web link address after upgrading to version 108. Example: If LP-399 IP is 10.1.1.3, please input <http://10.1.1.3:9999/speakerset.htm>.

如果你的軟件版本是低於 108 版, 在昇級後請在 LP-399 網頁上輸入下列地址, 更改設定為全雙工免提聽筒通話模式. 假設你的 LP-399 IP 地址為 10.1.1.3

<http://10.1.1.3:9999/speakerset.htm>

You can see speaker phone setting and select Half-Duplex or Full-Duplex at Hand-Free Speaker Phone configuration.

進入設定模式後, 可以看到 Full-Duplex 選項, 選取後就可以使用此功能.
