

Welltech Product Release Note

Date: Jun-16-2008

Model Name:	ePBX-100/ ePBX-100A	Object:	<input type="checkbox"/> H.W. <input checked="" type="checkbox"/> S.W.
Subject:	Release Application Rom for ePBX-100: app_204.app, ePBX-100A: Aapp_204.app		
Release contents			
Bug Fixed			
<ol style="list-style-type: none">1. Allowed alphabet can be inputted in SIP trunk line number field.2. Fixed some bugs of IVR files importing. The prompt file named vm-msginstruct.gsm could not be changed. And the IVR files of "time & date" group, is not work correctly after uploading via WEB.3. Resolved the issues of Call Transfer function between ePBX and Linksys Gateway.4. Revised the procedure of IVR recording. IVR recording can only support the entry point from the configured "system prompt recording" feature code (e.g. **50 -> 000 -> **111). No direct access to the IVR recording feature code (e.g. **111) is allowed.5. Fixed the extension summary display messed when call groups or pickup group has multiple group defined.			
Feature and Function Added			
<ol style="list-style-type: none">1. Add Random Ring feature for Dial Group. So the members will be ring randomly if somebody called to this Dial Group.2. Allowed Operator to be assigned to a Dial Group or Extension.3. When a ring all dialed group has no one answered after no answer timeout, you can choose to route to voice mail, IVR or an extension. The corresponding setting is "Ring All Type End To" within Dial Group web page.4. Add the function to show the current system time of ePBX.5. When operation console is set to an extension, you can assign to route to another extension or IVR by using OP Ext End To field.6. Support 2 offices, which can have different IVR prompts.7. Support configurable first digit timer ("AA End & Interval Timer") for auto attendant to collect the required digits.8. Support time based call routing for office incoming calls (**999 or **998).9. Support different call process such as Music RBT and Hot-Key Transfer based on call is routed through AA or not.10. Add field title for exported CDR.11. Support SMTP Server Authentication mode.12. Support specified Call pick up feature.13. Allow to use forwarder as caller ID when forward a call.14. Add the function to delete all of the voice mail and personal greeting from CF card via WEB.15. Added the current voice mail count in Web page.16. Add the function to enable or disable voice mail envelope.17. Add the function to modify the format of voice mail envelope.			

18. Add network routing table function.
19. Allowed to input alphabet as prefix for Incoming Call Rule
20. Add the function to enable or disable SRV lookup.
